

MAGNETIC TRAVERSE NTF 1200

For tank construction | only with current couplings NKK 800 or NKK 1200 | with permanent magnets

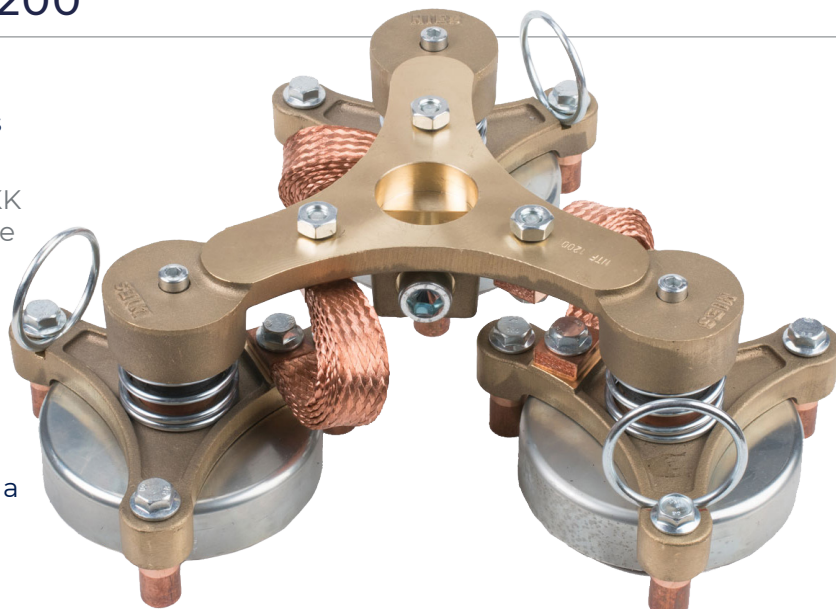

Magnetic traverse NTF 1200

NTF 1200 with permanent magnets

The magnetic traverse type NTF in conjunction with current coupling type NKK has been proving its reliability as a rotatable earth coupling in tank construction for many years. These devices are extremely robust, reliable and time-saving.

Three powerful magnets, insulated from the welding current and mounted on a movable suspension, firmly attach the device to flat and dished tank heads up to a minimum radius of curvature of 1000 mm.

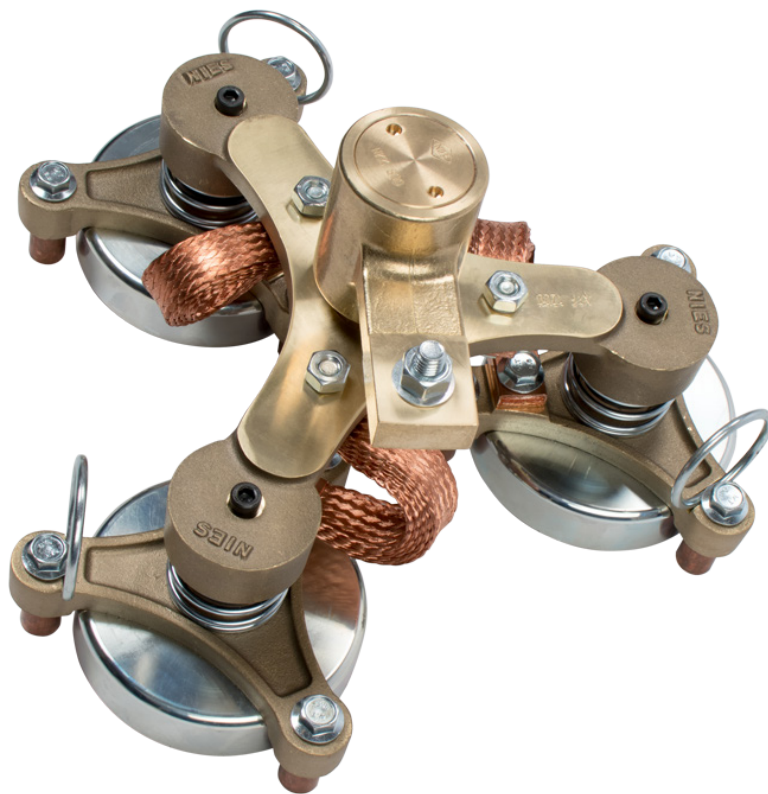

Nine spring-mounted, electrode-grade copper contacts provide good current transmission to the workpiece.

To be used only with current couplings NKK 800 or NKK 1200 sold separately.

- **Quick and easy to fit**
- **Powerful magnets ensure firm grip**
- **Copper contacts provide a good transmission of current**
- **Insulated magnets prevent scorching of workpiece**

**Welding current coupling type NKK with
Magnetic traverse type NTF 1200**

EXPERIENCE THE CONVENIENCE OF EVERYTHING UNDER ONE ROOF

At Lascentrum, you can find everything you need regarding products for welding and safety. Lascentrum has been established in 1988 and now imports a complete range of welding consumables, gouging electrodes, gas welding & cutting equipment, welding blankets, safety products and accessories.
